

Bottle Jacks, hydraulic from 2 t to 30 t

Welded design - no leaks

The hydraulic system with mounted manual pump (1) is powerful, compact, versatile, clean.

- maximum capacity and durability, because of double guidance
- 100% seal, robust and easy to disassembly, by automatic welded construction
- high standing and stability, due to large base plate (2)
- vertically and horizontally applicable, as long as the pump points upwards (3) !
- fast and easy adaptable in the height, per threaded extension within piston (4)
- with safety valve against overloading (5)
- steel piston made of one piece for extra durability
- practically to stowage, handle on pump consists of two parts to assemble/disassemble (6)

Ideal to be used in combination with the RODCRAFT jack stands.
